CS 3733 Operating Systems — Fall 2005 Assignment 5

Name ⎯⎯⎯⎯⎯⎯⎯⎯⎯⎯⎯⎯⎯⎯⎯⎯⎯⎯⎯⎯⎯⎯

Consecutively number the pages and fill in the table of contents below. Put a check mark in the box if you think the part was done correctly.

Attach the source code for the last part you successfully completed.
Do not include source code for parts that are not working correctly.

Description	source page
nserver.c	⎯⎯⎯⎯⎯
nserverp.c	⎯⎯⎯⎯⎯
nclient.c	⎯⎯⎯⎯⎯
nstart.c	⎯⎯⎯⎯⎯
additional source	⎯⎯⎯⎯⎯

Last part successfully completed: ⎯⎯⎯⎯⎯⎯

If you have successfully completed Part 5, attach at the end a page containing the output demonstrated on November 29.

If you completed at least part 4, answer the following questions:
1) How did you make sure that the sending and receiving the integers was not dependent on the hardware of the machines involved.

2) Did you test the `nclient` and `nstart` programs on machines with different architectures, e.g. one on a Sparc machine and one on a Pentium?

Unless you have successfully completed Part 5, describe in detail your progress on this assignment. This is important if you want to get credit for what you have done. (Continue on the back if necessary.)
